EDUCATION

The Northcap University

BTech in Computer Science, AI/ML Specialization

Cumulative GPA : 8.11

2020 – 2024

Gurugram, India

PROFESSIONAL EXPERIENCE

Quality Engineer L1

Publicis Sapient ☑

Experience in automated testing using Selenium ,TestNG, Rest Assured and proficient in Behavior-Driven Development (BDD) with Cucumber. Working on API, UI, and database testing, with designing and implementing robust test frameworks to ensure comprehensive software quality and performance.

Jan 2024 – present

Gurugram, India

National Brain Research Centre(NBRC) - Internship

India's first Medical Brain Imaging based database(SWADESH) development. ☑

- Engineered front-end and back-end components, encompassing certain server operations and management.
- Front End (HTML, CSS, and JavaScript) Back End(Django, SQL, Python) OS - Linux (Ubuntu).

Apr 2023 – Jul 2023

Gurugram, India

Tata Prashikshan – Internship

TATA STEEL Jamshedpur -Jharkhand ☑

Project title: A cross-platform App to scan and generate optical characters(Barcodes, QR codes)

- Worked on a cross-platform framework Flutter and its various libraries for developing the scanning and generating optical character feature of the App.
- Integrated for both ios and android, its authentications, permissions, Front-end, and version problems. Separate login UI for Admin and employees.

May 2022 – Jun 2022

Jamshedpur, India

PROJECTS

1)AI-Fall Guard ☑

Real-Time Fall Detection and Response using AI/ML

- Implemented real-time data processing of Accelerometer and Gyroscope sensor readings to accurately detect falls and distinguish them from other movements.(Flutter Package used - sensors_plus: ^3.1.0)
- Utilized machine learning and AI algorithms to analyze sensor data, enhancing the accuracy of fall detection and reducing false positives.
- Integrated notification and alert systems to promptly inform users and their emergency contacts in case of a fall event.

2)Rio ☑

An AI voice assistant

- Developed a prototype of an Alexa-like AI voice assist device using python, machine learning, and Raspberry Pi.
- Integrated it with the wake-up word 'Hey Rio' and an accuracy of 95%.

3)Volunteer Service Manager ☑

Python Gui based project which enabled tracking community service hours by the folks.

- I developed the front end of the application (login page, separate UI for faculty and students). Used firebase for login of faculty and students individually.

SKILLS

Coding languages : Python , Java , Dart

Development framework: Flutter , JS, Django, SQL, Selenium, Jenkins

AI/ML Algorithms and Models, SDLC models, GitHub Copilot

Libraries: Pandas , Numpy , NLTK, Matplotlib, Seaborn, Scipy and Flutter packages, OpenCV.

AWARDS AND RECOGNITIONS

Google Hash Code ☑

Gold badge - 1659324 pts

Feb 24, 2022

INEA-SERB Youth Conclave -2022 IIT Jodhpur ☑

My team and I was selected for the final round of the Hackathon which was held at IIT jodhpur.

Oct 19, 2022

CERTIFICATIONS

Gen AI level 1 ☑

Slingshot

Python full-stack developer

Masterclass

Udemy

AWS Academy Machine Learning

Foundations

Amazon web services
